SAIMA USMAN

DevOps and Cloud Engineer

Dubai, UAE | saimausman.dxb@gmail.com
linkedin.com/in/saima-usman | github.com/Saima-Devops

PROFESSIONAL SUMMARY

DevOps Intern with hands-on cloud, infrastructure automation and CI/CD project experience, supported by five years of SDLC project management. Postgraduate diploma in Cloud Architecture and DevOps with Distinction, 2026. Build secure containerized applications and AI-assisted engineering workflows using AWS, Azure, Terraform, Docker and Claude Code. Bring clear documentation, collaborative delivery and calm problem-solving, with a growing focus on MLOps.

TECHNICAL SKILLS

Cloud: AWS, Microsoft Azure, EC2, VPC/VNet, IAM/RBAC, RDS, networking, storage, CloudWatch

Infrastructure and containers: Terraform, Ansible, CloudFormation, Docker, Kubernetes, Helm, EKS/AKS

Delivery and scripting: Git, GitHub, GitHub Actions, Azure DevOps, Jenkins, Python, Bash, Linux

Security and observability: GitLeaks, Semgrep, Trivy, SonarQube, Prometheus, Grafana, Alertmanager

Application and data: FastAPI, React, Next.js, Node.js, Express, PostgreSQL, MySQL

AI assisted engineering: Claude Code, Codex, Ollama, Gemini, Amazon Bedrock, RAG, MCP, tool calling

Project delivery: Agile, Jira, backlog planning, sprint tracking, stakeholder coordination, risk management

PROFESSIONAL EXPERIENCE

AI Assisted DevOps Intern

Cloud Advisory, Oy | Finland, Remote | Present

- Build AI-assisted workflows across Git, Linux and CI/CD using Claude Code and agentic tools.
- Implement Git hooks, AI-powered pull-request reviews and DevSecOps security automation.
- Support Linux troubleshooting and developer workflows using Claude Code skills, hooks and memory.

Project Manager

VCode Middle East | Dubai, UAE | 2019 - 2025

- Managed end-to-end SDLC project delivery, aligning scope, timelines and deliverables with business objectives.
- Coordinated developers, operations and stakeholders; tracked progress and risks, and maintained delivery documentation and reporting.

Digital Content Creator

Branex Technologies | Karachi, Pakistan | 2009 - 2010

- Researched, wrote and edited digital content; maintained website updates and developed SEO-focused articles.

EDUCATION

Postgraduate Diploma in Cloud Architecture and DevOps | Distinction, 2026
Hero Vired, Virtual Education

Master's Degree in Multimedia | 2008 - 2010
National College of Arts, Lahore, Pakistan

Bachelor's Degree in Computer Science | 2000 - 2004
Grace Institute of Technology, Karachi, Pakistan

SELECTED PROJECTS

SecureGate AI

DevSecOps capstone | FastAPI, React, PostgreSQL, Docker, Ollama and Gemma

- Built a security decision platform that normalizes CI/CD scan findings, scores risk and evaluates deployment gates.
- Integrated GitLeaks, Semgrep, Trivy and SonarQube findings with reporting, notifications and security policies.
- Added local AI-assisted remediation guidance and visibility through Prometheus, Grafana and Alertmanager.

github.com/DevOps-Capstones/SecureGate-AI

Bookshelf

Full-stack cloud delivery | Next.js, React, Node.js, Express, Sequelize and MySQL

- Developed a community book-sharing application with discovery, ratings, editable reviews, favourites and administrator moderation.
- Evolved deployment from AWS EC2 to Northflank with Aiven-managed MySQL, verified TLS connections and database backups.
- Implemented multi-stage Docker builds and non-root containers; automated tests and dependency checks with GitHub Actions before publishing versioned images to Docker Hub and controlled deployment.

github.com/Saima-Devops/Book-Review-App

AI Assisted DevOps Internship Projects

AWS, Azure, Terraform, Ansible, Azure DevOps, Docker, Bash and Claude Code

- Deployed three-tier applications using AWS load balancers and RDS Multi-AZ, and Azure Application Gateway with privately connected MySQL.
- Built Git safeguards, Terraform drift and policy checks, Ansible dry-run risk reviews and CI/CD failure triage with human-controlled changes.
- Reduced a Docker backend image from 1,597.78 MiB to 261.96 MiB, an 83.6% reduction; tested backend and database recovery without deleting application data.

Additional AI Applications

- **Offline DevOps AI Assistant:** Containerized Ollama and Phi-3 Mini for local CLI assistance without external cloud APIs.
- **AI Study Buddy:** Built a Streamlit application with Gemini-powered chat, note summaries and generated quizzes. **World Weather Hub:** Developed a Flask application using OpenWeatherMap and geolocation APIs.

PROFESSIONAL DEVELOPMENT

Completed learning: Python Language Fundamentals - Harvard University; 5G, IoT, Automation, AI and Machine Learning - Ericsson Educate; Understanding AI and LLMs as a Network Engineer - Cisco U.; AI, Networking and Cloud Fundamentals - Huawei; Agentic AI POC to Production on AWS - BeSA Academy and WhizLabs.

In progress: AWS Certified Solutions Architect - Associate (SAA-C03) exam preparation; Microsoft Azure Fundamentals (AZ-900) exam preparation; Deploy and Manage Generative AI Models - Google Skills.
